  - Report

## **2 Assignment**

what is dit voor opdracht eigenlijk

### **3 Inhoud**

what kind of content is the project going to hold

## 4 Design

Subsections describe specifics about each breakpoint

### 4.1 Moodboard

This is pretty much a quick overview of the design. It needs to have:

- Typography representation
- Icons
- Examples of images
- Colorscheme with purpose assigned to each color

Illustrate the visual style you're going to use.

### 4.2 Extra small devices (600px and down)

### 4.3 Small devices (600px and up)

### 4.4 Medium devices (768px and up)

### 4.5 Large devices (992px and up)

### 4.6 Extra large devices (1200px and up)

## 5 Backend

What functionalities the backend will provide, divided into categories.

- Authorization/Authentication
  - Create a user with username and password
  - Hash password before db save
  - Sign in/Authenticate: check if username exists and if password matches
  - API Endpoints
- DB Queries
- API Endpoints

## 6 Frontend

pages

- Welcome: choose to sign in/up or continue without account
- Home: display all threads and stuff
- Individual thread: display all comments
